

CANADA'S ONLY "DRY SPRAY TAN" CONTAINS ALL-NATURAL ORGANIC INGREDIENTS
NO ORANGE, NO ODOR, NO STICKINESS – GUARANTEED!
OFFICIAL SPRAY TAN OF THE TORONTO ARGO CHEERLEADERS

SPRAY TAN INSTRUCTIONS (recommended)

PRE-SPRAY TAN

1. **If possible exfoliate before your spray tan.** For best results use **FOTOSHOOT Nano body scrub** (prevents blotchiness)
2. Do all shaving/waxing & hair washing **before** the spray tan (be sure ALL wax is removed)

DAY OF YOUR SPRAY TAN

1. Arrive with **clean showered skin (No moisturizer/deodorant)**
2. Wear **loose clothing** & if possible avoid putting tight-fitting articles on (e.g. bra, socks) immediately after your spray

CRITICAL PERIOD (from the time you get sprayed until the FIRST shower)

1. **Avoid ALL liquids such as rain, sweat, lotion, etc. (note: slight imperfections usually even out after the first shower)**
2. Try to wait **2 to 8 hours** (5 hrs is ideal) until taking your first shower
3. First shower **should be gentle, water only if possible** .GENTLY pat dry. Try to **AVOID GETTING SHAMPOO ON YOUR TAN**, if possible as it can fade the spray tan.
4. **If possible, avoid tight clothing** for first 30 min

AFTER YOUR FIRST SHOWER (continue with same showering instructions as above)

1. Moisturizing often prolongs your tan. (For best results, use **FOTOSHOOT Glow Serum** helps prevent blotchiness)

ATTENTION: FOTOSHOOT Glow Serum should be used daily **even when not tanning/spray tanning**--it will maintain a year-round youthful glow and minimize the appearance of imperfections (stretch marks, veins, etc); it's the key to a perfect complexion all year!

SPRAY TAN REMOVAL

1. Soak in tub **10 min**, and then scrub head to toe with washcloth. Partially dry off then rub **Nano Body Scrub** from head to toe for 5 min. *Rinse well!*

NOTE: If a few days after your spray you have a slight inconsistency, gently rubbing **Nano Body Scrub** (rinse well) can sometimes correct it.

FREQUENTLY ASKED QUESTIONS

Q: Are all spray tans the same?

A: **NO.** REALTAN has **CANADA'S ONLY DRY SPRAY TAN SYSTEM**, fully dry in 1 min! **ZERO orange, odor or smudging** (other spray systems are "WET" spray tans and notorious for being sticky, smelly, orange, and rubbing off easily). Also many clients have commented that our dry spray actually **improves** the feel of their skin (due to ultra-high antioxidant levels).

Q: Can I still tan outside or in the beds after getting a spray tan?

A: Yes, though it is recommended to wait until after your **FIRST** shower. Immediately after getting the spray tan, you may use a stand-up machine. All other forms of tanning can be done after the first shower.

Q: What do I wear **DURING** the spray tan process and will it stain my underwear/bikini?

A: It's up to you; it ranges from nothing to one-piece bathing suits, bikinis/underwear, & everything in-between. Body stickers are available which offer no tan lines, but still provide coverage (\$2 for top & bottom). Staining is rare, but possible; try to avoid wearing white. If any staining occurs, wash immediately.

Q: Are there products that can prevent blotchiness and premature fading?

A: **YES. FOTOSHOOT Glow Serum & FOTOSHOOT Nano Body Scrub.** (These can also be used year round even when not spray tanning to achieve a perfect youthful complexion. **NOTE: Great for acne, psoriasis & eczema!**)
